

Pro Version 1.0 (20-10-2010) Pro: Linux Distribution CINEMA 4U (35 MB) !You can send up to 10 alarms per day and 1 alarm per hour! Cinema 4U 2000 Pro Version NETBIOS Information: This is an ANSI C-compatible implementation of the NetBIOS API. This includes the broadcast, name, user, and group name resolution functions. It also includes the format conversion functions. The resulting data is displayed in tabular form. Cinema 4U 2000 Standard Version NETBIOS Information: This is the most standard C implementation. It includes all the functions from the ANSI C specification, with the addition of the MS-CALL program command, which can be used to call up to 64 other applications. It can be used as a library for simple applications. FreetiNC Database: The network addresses and user names of the stations on the network are stored in a database. The database contains up to 1000 different network addresses. Network Browser: The Network Browser is a valuable tool for the user. The Network Browser contains nearly all available information on the network as well as many other features like: Find out the connected IP/MAC-addresses of other clients Displays the network status and status information of all connected devices (BUDDY, VIP-app, my router etc) Network Browser allows to create and edit documents about the network that can be further forwarded by e-mail View the documents created in the Network Browser View information about the network or any client connected to it Search for network addresses View all devices connected to the network (addresses, clients, server, computers) Meterpreter: The Meterpreter is a high level payload using port 80 on the remote host. This payload allows the machine to scan the network for other IP addresses, open tunnels and record your password. SQL Database Browser: The SQL Database Browser will display tables, columns and rows in a structured way. It will allow you to search through hundreds of tables and run reports on the collected data. SQL Database Browser allows to search the structure of the database SQL Database Browser allows to create reports on the collected data SQL Database Browser allows to export the selected data to a text file or Excel spreadsheet SQL Database Browser allows to select the data of the selected table SQL Database Browser allows to search the contained data by column SQL Database Browser allows

i.e. IP addressing for servers and switches as well as IP routing for Cisco routers ii. LAN, WAN IP addresses iii. Subnet, Active Directory and Domain / Domain Controller configuration VIPWISER VIPWISER is a free utility to automatically detect wireless networks on a computer network. Compatible with Windows 2000,XP,NT,2000 Server,2003 Server,2005 Server,and newer. (VIPWISER can discover these machines also) VIPWISER is Windows compatible and provides Windows network administrator features. It is compatible with IPX,Netbios NetWare, IP, Windows Media Player, UPNP Discovery, TCP/IP, NetBIOS, NetBios, TCP/IP, Media (TS Connect, RealNet & Multimedia), MacTalk & POP3/ESP VIPWISER is an application that helps Network Administrators to set up Group Policy for their Windows 2000,XP,2003 Server or newer environments in order to facilitate easy access to multiple wireless networks on a per-user basis. VIPWISER is updated frequently with new features, latest information, security updates and workarounds for wireless networks. Stay up-to-date by installing VIPWISER updates. VIPWISER is compatible with Windows 98, Windows ME and Windows 2000/XP/2003/Windows NT4, Windows 2000/NT/2000 Server/NT4.1, Windows 2003/XP/2003 Server/NT4.1, Windows Vista/Windows Server 2008, Windows Server 2008 R2, Windows 7/Windows Server 2008 R2, Windows 8/Windows Server 2012, Windows 7 (up to SP1). The following versions/features are currently supported in VIPWISER with latest updates: VIPWISER Version 5.11.1 (build 1509) VIPWISER Version 6.04.1 (build 1498) VIPWISER Version 6.05.1 (build 1490) VIPWISER Version 6.06.1 (build 1458) The easiest way to create a directory for your pictures, music, files or movies on your network without the need for a file server. This application allows you to turn any one of your windows devices into a media server to play and store audio and video files to your network. Description: Stuff is a creative and powerful yet easy-to-

What's New In Address Wizard Pro?

Address Wizard Pro is a powerful address discovery tool. Will show you all available addresses (IP address and MAC address) of your computers and Network Devices, including all sub-interfaces. It will also show you the different stations on the network by name (NetBIOS), user name, group name, or MAC address. Address Wizard also has a nice timer for passive scans and will inform you when something changes. Furthermore, Address Wizard can inform you about double IP addresses, changes in MAC address, or station names. Moreover, you can define up to 15 address ranges which can be scanned periodically. Between those active scans the application will listen and detect addresses that are not in the defined ranges. Finally, the application can be accessed by a remote host via RPC (remote procedure call). Features: DNS Usage Mac Address/NetBIOS/Browser Information IP Address-discovery IP/MAC/NetBIOS/Browser comparison Find stations that broadcast using the NetBIOS name or a NetBIOS username Works for complete names Find stations that are active Will show you all available addresses Monitoring for unknown IP addresses Will inform you when stations change NetBIOS discovery and comparison Double IP Address Detection Changes in MAC address Listened on stations External RPC Call - detect IP's not in ranges Working on VLANs Starts working right after start of program No restart required Active Monitoring - find out when MAC Address changes Can be started from batch file Support for Active Monitoring Support for Passive Monitoring SafePC-Control is a network and computer monitoring application that will alert you via E-mail, SMS and/or Pager if your computer or network is in violation of settings. See the To-Do list for all currently supported features: Network activity monitoring User activity monitoring Network hardware monitoring Network services monitoring Network Diagnostics Hard Drive activity monitoring Hard Drive Full/ Free space monitoring CPU activity monitoring Network Monitoring Network Usage Monitoring Network Disk space Monitoring CPU Monitoring Process monitoring Process Summary Monitoring Network Bandwidth Monitoring Network Packets Per Second Monitoring Network Activity Summary Monitoring 

System Requirements For Address Wizard Pro:

OS: Windows 7 64-bit, Windows 8 64-bit, Windows 8.1 64-bit Processor: Intel Core i3-2120 (3.10GHz) / AMD Phenom II X4 945 (3.7GHz) Memory: 2GB RAM Graphics: Intel HD 4000 / AMD HD 7000 series DirectX: Version 11 Network: Broadband Internet connection Hard Drive: 35 GB available space Sound Card: DirectX compatible sound card Keyboard: English keyboard Other: Mouse
