Adobe Photoshop CS2 patch is an Adobe Photoshop extension. What's New Overview Adobe Photoshop CS2 patch is an Adobe Photoshop extension. This program allows you to make your own patch for Photoshop. You can create a new folder by right clicking on your CS2, and then selecting New Folder in the context menu. Once you have created a new folder, you will want to give it a descriptive name. For example, I named mine "Patch". You can use any descriptive name you would like. The name of your new folder will appear in the file picker, which is located in the top left of your Photoshop application window. Steps 1 Open Adobe Photoshop. Once you have opened Adobe Photoshop, go to Window->Open and select the folder that you would like to patch. Then, select Patch and select OK to start patching Photoshop. This will bring up a window where you can select how you would like to patch Photoshop. The options include: 2 Add Custom Libraries. This is the options you want to use to add custom libraries to Photoshop. You will use this option to add other custom libraries in the future, as you will see in Step 4. 3 Set Filename Format. This option allows you to set the filename format that will be used when you are patching Photoshop. This will help you to keep track of your patch libraries easier. 4 Set Library Version. This option will allow you to select which version of Photoshop you are patching. If you don't set this option, the patch will always be compatible with the current version of Photoshop that you are using. If you are patching Photoshop CS2, you will need to set this option to be 2.00 or higher. 5 Set a Name for this Library. This option allows you to set a name for your library. You can use any descriptive name that you want. 6 Set an Extension for this Library. This option allows you to set an extension for your library.
